

Technical Notification 207

Dated: November 30, 2017

Re: Synchronized Skating – Calling Clarification for Whip or Angled Intersection (Applicable for Juvenile Teams) for 2017-18 Season.

For juvenile teams, U.S. Figure Skating caps the level that can be achieved for the intersection element at a Level 2. This technical notification clarifies the calling instructions for juvenile teams that attempt a whip or angled intersection – for these teams, the technical panel will start calling the intersection at a Level 2 and apply any reductions accordingly.

For example, the intersection level is reduced to a Level 1 for one error and to a Level Base for two errors.
