

Technical Notification 49

DATED: June 25, 2009

Technical Notification 49 supersedes Technical Notification 34. There are no substantive changes other than this notification will no longer refer to pairs at the Juvenile level and the ISU Communication citation will refer to the current season's ISU Communication. Please be advised that a new technical notification regarding Juvenile pair spins will be released in due course.

RE: Singles

Spin Clarifications for the Short Program and the Free Skate

A spin occurs when the skater completes a total of 3 revolutions. If this requirement is not fulfilled, the attempted spin has no value.

A change of foot occurs when the skater has fulfilled 3 revolutions in total before and after the change of foot.

I. Juvenile & Open Juvenile Free Skate

A. Spin in one position without change of foot

If a basic position is not attained, the skater shall receive no higher than a Level 1, and variations shall not be awarded.

B. Spin in one position with a change of foot

If a basic position is not attained on either foot regardless of variations attempted, the skater shall receive no higher than a Level 1, and variations shall not be awarded.

C. Flying spin in one position

If a basic position is not attained, the skater shall receive no higher than a Level 1, and variations shall not be awarded.

D. Combination spin with or without change of foot

The technical panel will follow ISU requirements in determining the skater's level of difficulty.

II. Intermediate and Novice Short Program

A. Spin in one position

The spin in one position must be in a basic position for 2 revolutions. If not achieved, the skater will receive no value.

B. Layback spin (LSp)

The Biellmann feature on the layback will be awarded after five revolutions for the Intermediate Short Program, and six revolutions for the Novice Short Program.

C. Combination spin with a change of foot (CCoSp)

As per USFS requirements, the CCoSp in the Intermediate and Novice Short Program must have at least one change of position. A change of position occurs when a skater changes from 1 basic position to another basic position (minimum of 2 revolutions in each)

In the Intermediate and Novice Short Program, if the skater fulfills the requirement of at least one change of position in the CCoSp, the skater is eligible to achieve Levels 2-3 if feature requirements are fulfilled according to the current season's ISU Communication for calling specifications, currently ISU Communication 1557.

Skater must achieve all 3 basic positions for a Level 4.

If there are 2 revs on one foot in a basic position, but less than 2 revs. in a basic position on the other foot, the Spin will have Level 1 (but not higher) if this basic position was at least reached; The Spin will have No Level if the basic position on the other foot was never reached.
