WHAT IS SYNCHRONIZED SKATING?

WHAT IS SYNCHRONIZED SKATING?

Synchronized skating is a highly technical form of team skating characterized by speed, accuracy, intricate formations and transitions. Teams of eight to 20 skaters perform side by side on the ice. At the junior and senior levels, teams perform one 2:50-minute short program and one 3:30- or 4:00-minute free skate in competition.

The juvenile through senior levels are skill-based and all members on a team must pass level-specific moves-in-the-field tests to participate in that discipline. The collegiate level is for college teams, while the masters and adult levels are for skaters aged 25, and 18 and over, respectively. In addition, there are nine developmental levels that prepare athletes for competition at the national level.

COMPETITIONS & QUALIFYING

Teams can participate in any nonqualifying competitions they choose to enter. Those teams wishing to compete in the U.S. Figure Skating qualifying pipeline must start at the sectional championships. By finishing in the top four at their sectional, teams at the juvenile, intermediate, novice, junior, collegiate, adult and masters levels qualify for the U.S. Synchronized Skating Championships. Based on performances and placements from this event, junior and senior teams are nominated to Team USA and assigned to international competitions.

MEMBERSHIP

The membership of U.S. Figure Skating, at more than 200,000 members, has embraced synchronized skating as more than 615 teams register and compete each year.

SYNCHRONIZED SKATING HISTORICAL TIMELINE

1956: Dr. Richard Porter of Ann Arbor, Michigan, organized a group of skaters to form a team.

1976: The first competition for team skating was held in Ann Arbor, Michigan.

1984: The first U.S. Precision Team Championships were held in Bowling Green, Ohio.

1989: The first international synchronized skating competition was held in Mölndal, Sweden, with seven nations represented.

1994: The International Skating Union (ISU) officially recognized precision skating as a discipline of figure skating at the ISU Congress.

1996: The first of four ISU World Synchronized Skating Challenge Cups was held in Boston, with 17 teams from 13 countries competing. The event, which was known as the unofficial World Championships, was last held in Gothenburg, Sweden, in 1999.

2000: The first ISU World Synchronized Skating Championships were held in Minneapolis.

2001: The first ISU World Challenge Cup for Juniors was held in Neuchâtel, Switzerland.

2007: Miami University won a historic silver medal at the ISU World Synchronized Skating Championships 2007 in London, Ontario, Canada.

2015: A synchronized free skate competition was included at the ISU Grand Prix of Figure Skating Final in Barcelona, Spain.

2016: The Haydenettes became the first U.S. team to win a segment of World competition, winning the free skate in Budapest.

2017: An ISU working group was selected to put together a proposal for the Olympic Winter Games Beijing 2022

2018: Skyliners junior won a historic silver medal at the ISU World Junior Synchronized Skating Championships 2018 in Zagreb, Croatia.

2019: The ISU implemented the Challenger Series Synchronized Skating to give more opportunities for teams to compete at the international level and earn World Standing Points

COLLEGIATE SYNCHRONIZED SKATING

Skaters from different backgrounds find that there is no experience quite like being a member of a collegiate synchronized skating team. Synchronized skating veterans around the country are teaming up with freestyle skaters and ice dancers who are trying this exciting sport for the first time. College teams generally compete in one of three U.S. Figure Skating divisions: collegiate, open collegiate or senior.

Collegiate synchronized skating teams compete in nonqualifying and qualifying events. Teams that compete in the senior division are eligible to be selected for U.S. Figure Skating's international selection pool and may represent the United States at international events. Synchronized skating is now an event at the World University Games and only teams made up of student-athletes may represent the United States at this competition.

There are a number of ways teams can be structured on college campuses, including club sports, student organizations or activities, and varsity sports.

In 2019, 35 teams competed in U.S. qualifying competitions in the collegiate and open collegiate divisions. At the 2019 U.S. Synchronized Skating Championships, two universities were represented in the senior division and both were members of Team USA.

WHAT IS SYNCHRONIZED SKATING?

WHAT ABOUT THE OLYMPIC WINTER GAMES?

Synchronized skating is the newest discipline of figure skating. It was first recognized by the International Skating Union (ISU) in 1994 and the first World Championships were held in 2000.

In 2015, a proposal was submitted to the International Olympic Committee (IOC) to consider the inclusion of synchronized skating at the Olympic Winter Games PyeongChang 2018. Although the discipline was not accepted for 2018, the process was seen as the first step in defining the requirements needed for synchronized skating's full inclusion in the future. In the same year, a free skate event was held for synchronized skating for the first time at the ISU Grand Prix of Figure Skating Final in Barcelona, Spain.

U.S. Figure Skating's approach has been to put efforts into building the strongest U.S. program possible so that when/if synchronized skating is included in the Olympic Winter Games, U.S. teams will be prepared to stand on the podium. The sport's bid to be included at the Olympic Winter Games Beijing 2022 was not accepted.

SYNCHRONIZED SKATING AROUND THE WORLD

Synchronized skating started in the United States, but it has quickly spread around the world. In the past several years, 28 countries on five continents have participated in either the World Junior Synchronized Skating Championships (formally known as the World Challenge Cup for Juniors) or the World Synchronized Skating Championships. Scandinavian countries have dominated the World Synchronized Skating Championships, winning 15 of the 19 World titles that have been awarded since the first event in 2000. Canada and Russia are the only other countries to have reached the top of the podium, earning the 2009, 2015, 2016 and 2017 World titles. The United States is a strong presence on the world scene, having captured six World medals and two World Junior medals.

		LEVEL	AGE RESTRICTIONS	MAJORITY AGES	# OF SKATERS	TEST REQUIREMENTS
COMPETITIVE LEVELS	DEVELOP-MENTAL LEVELS	SNOWFLOW SAM	All ages	Under 7	5-12 skaters	None
		SYNCHRO SKILLS 1-3	All	Varies	8-16 skaters	None
		PRELIMINARY	Under 12	Under 10	8-16 skaters	None
		PRE-JUVENILE	All ages	Under 13	8-16 skaters	None
		OPEN JUVENILE	Under 20	Varies	8-16 skaters	Pre-preliminary
	COMPETITIVE LEVELS	JUVENILE	Under 13	N/A	12-20 skaters	Pre-juvenile
		INTERMEDIATE	Under 18	N/A	12-20 skaters	Juvenile
		NOVICE	Under 16*	N/A	12-20 skaters	Intermediate
		JUNIOR	13-18	N/A	12-16 skaters	Novice
		SENIOR	At least 15	N/A	16 skaters	Junior
	COLLEGIATE LEVELS	OPEN COLLEGIATE	Full-time college student	N/A	8-16 skaters	None
		COLLEGIATE	Full-time college student	N/A	12-20 skaters	Juvenile
	ADULT LEVELS	OPEN ADULT	All ages	Over 19	8-16 skaters	None
		ADULT	21 and over**	N/A	12-20 skaters	Preliminary
		MASTERS	25 and over	30 and over	12-20 skaters	None
		OPEN MASTERS	25 and over	30 and over	8-16 skaters	None

*Four skaters may be 16 or 17 years of age. ** Four skaters may be 18, 19 or 20 years of age.

JUDGING SYSTEM

JUDGING SYSTEM

Like all disciplines of figure skating, synchronized skating has transitioned to the international judging system (IJS). All juvenile, intermediate, novice, junior, senior, collegiate, adult and masters events are judged under the IJS.

Each level in synchronized skating has a defined “well-balanced program” that contains a set number of prescribed elements each team must perform in its free skate. Teams are given a technical elements score based on the specified difficulty and execution of those prescribed elements. Teams may perform additional elements, however, these will not be taken into consideration in their technical elements score. Teams are also given a program components score that takes into consideration skating skills, transitions, performance, composition and interpretation. For levels judged under the old 6.0 system, the panel of judges will award two marks based on those concepts.

The IJS has two panels: a technical panel and a judging panel. The technical panel consists of a technical controller, a technical specialist and an assistant technical specialist. This panel identifies the difficulty of each of the prescribed elements in the program. That difficulty level corresponds to a point value for each of the elements. The judging panel, which consists of three to nine judges, evaluates how well each of the elements was done on a scale of -5 to +5. A trimmed mean of the judges’ grades of execution for each element is factored with the points awarded for difficulty. Finally, each judge also gives a program components mark rang-

ing from 0.25-10.00 for each of the following areas: skating skills, transitions, performance/execution, choreography and musical interpretation. Again, a trimmed mean is taken for each of the five components.

The total score for each team is computed by taking the technical elements score (the total points the team earned for difficulty factored with their grade of execution for each of their well-balanced program elements) and adding it to their program components score (the total of the trimmed mean for each of the five program components - each of the three components for juvenile).

Teams at the junior and senior levels compete both a short program and a free skate. The points earned for each segment of the competition are added together for the final result. Teams in all other levels perform only a free skate.

SEGMENTS OF COMPETITION

SHORT PROGRAM

The short program is only competed at the junior and senior levels. For synchronized skating, this segment consists of a 2:50-minute program that includes required elements. Deductions are taken in the final score if these elements are not included. The order is optional.

FREE SKATE

A synchronized free skate contains numerous elements linked together by a variety of transitions. For junior and senior events, the short program and free skate scores are added together for a combined score to determine the winner.

PROGRAM REQUIREMENTS

2020 SHORT PROGRAM REQUIREMENTS**SENIOR | Max Time: 2:50**

One intersection element, one move element, one no-hold element, one traveling element (circle) and one pivoting element (block).

JUNIOR | Max Time: 2:50

One intersection element, one move element, one no-hold element, one traveling element (wheel) and one twizzle element.

2020 FREE SKATE REQUIREMENTS**SENIOR | Time: 4:00 +/- 10 seconds**

Two different intersection elements, one move element, one creative element (lift), one no-hold element, one twizzle element, one pair element and one artistic element (circle or wheel).

JUNIOR | Time: 3:30 +/- 10 seconds

Two different intersection elements, one move element, one traveling element (circle), one no-hold element, one synchronized spin element, one pivoting element (block) and one artistic element (line or wheel).

NOVICE | Time: 3:00 +/- 10 seconds

One intersection element, one move element, one traveling element (circle), one no-hold element, one twizzle element, one pivoting element (block) and one artistic element (line or wheel).

INTERMEDIATE | Time: 3:00 +/- 10 seconds

One intersection element, one move element, one traveling element (circle or wheel), one no-hold element, one twizzle element, one pivoting element (block) and one artistic element (line, wheel or circle).

JUVENILE | Time: 2:30 +/- 10 seconds

One intersection element, one move element, one traveling element (circle or wheel), one twizzle element, one pivoting element (block) and one artistic element (line or wheel or circle).

**COLLEGIATE | Time: 3:30 +/- 10 seconds**

Two different intersection elements, one move element, one traveling element (circle), one no-hold element, one synchronized spin element, one pivoting element (block) and one artistic element (line or wheel).

ADULT | Time: 2:30 +/- 10 seconds

One intersection element, one traveling element (circle or wheel), one rotating element (wheel or circle or line), one pivoting element (block) and one artistic element (block, line, wheel or circle).

MASTERS | Time: 2:30 +/- 10 seconds

One pivoting element (block), one rotating element (wheel or circle) or linear element (line), one creative element (intersection) or mixed element, one intersection element, one artistic element (block, wheel, circle, line) and one traveling element (wheel or circle).

SYNCHRONIZED SKATING ELEMENTS

GROUP LIFT

The group lift involves a skater being lifted by two or more skaters. A team will perform one to four group lifts that may rotate and glide down the ice. Some features that increase the difficulty of the element include the lifted skaters' position in the air (flexible, balanced), change of position of the lifted skater, difficult or creative entry and exit of the lift, and the lifts rotating in both rotational directions, as well as other creative moves.

BLOCK

A block is an element in which skaters are arranged in parallel lines. A block can be pivoting, linear or artistic, and must contain a minimum of three lines. The lines of skaters should be straight and all of the skaters should be spaced evenly. A block can move diagonally down the ice, across the ice, in a circular pattern or pivot around a certain point. Features that make a block increase in difficulty are pivoting, change of configuration, change of axis, change of position and step sequences.

MOVE ELEMENT

The move element is a sequence of movements that include free skating moves such as spirals, spread eagles and

Ina Bauers. A team can perform one to four different field moves, and the team can elect which skaters do which move to enhance creativity.

SYNCHRONIZED SKATING ELEMENTS

**CIRCLE**

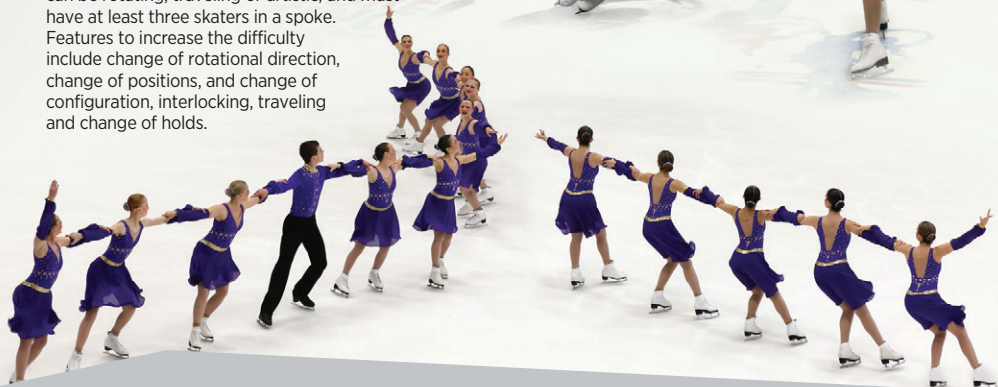

A circle shape should be round and spacing between skaters should be even with no tugging or pulling between skaters. The circle element can be rotating, traveling or artistic, and should have at least four skaters in the circle. Skaters may travel, weave, interlock, change rotational direction, change configuration and change places/positions with another skater.

PAIR ELEMENT

The pair element occurs when pairs of skaters perform free skating elements, free skating moves or other skating movements. The pairs must act as a unit and perform the same movement at the same time. An example of a pair element would be a pair pivot.

**WHEEL**

A wheel is an element during which all skaters rotate around a common center point. It can be performed in many different formations including two-spoke, three-spoke and parallel lines. A wheel can be rotating, traveling or artistic, and must have at least three skaters in a spoke. Features to increase the difficulty include change of rotational direction, change of positions, and change of configuration, interlocking, traveling and change of holds.

SYNCHRONIZED SKATING ELEMENTS

CREATIVE ELEMENT

The creative element is a presentation of one or more creative and innovative movements such as but not limited to: free skating elements and/or moves made in an interesting manner which reflects the music. Synchronized skating program elements may be incorporated into the creative element.

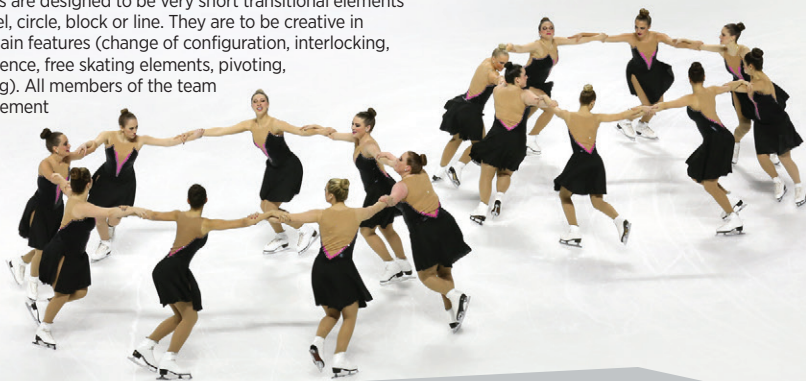

SYNCHRONIZED SPIN

A synchronized spin is a freestyle spin done in unison. A spin as simple as a scratch spin or as difficult as a layback may be performed, however all skaters must rotate at least three revolutions on one foot. The spin must be executed in a closed block formation with the focus on unison throughout the entry, rise up from the knee, rotation and exit of the spin.

ARTISTIC ELEMENT

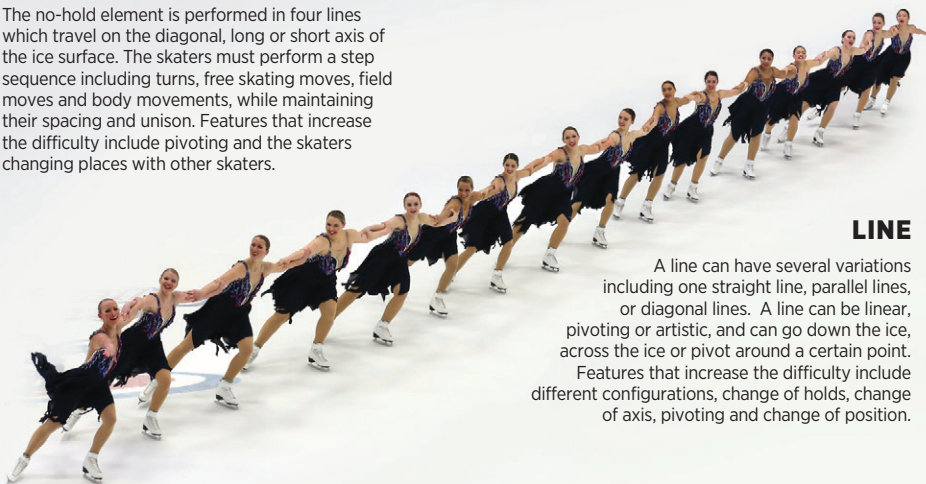

The artistic elements are designed to be very short transitional elements consisting of a wheel, circle, block or line. They are to be creative in nature and can contain features (change of configuration, interlocking, choreographic sequence, free skating elements, pivoting, intersecting/weaving). All members of the team must execute this element together.

SYNCHRONIZED SKATING ELEMENTS

**NO-HOLD
ELEMENT**

A no-hold element is similar to a block, however the skaters are not connected to one another. The no-hold element is performed in four lines which travel on the diagonal, long or short axis of the ice surface. The skaters must perform a step sequence including turns, free skating moves, field moves and body movements, while maintaining their spacing and unison. Features that increase the difficulty include pivoting and the skaters changing places with other skaters.

**LINE**

A line can have several variations including one straight line, parallel lines, or diagonal lines. A line can be linear, pivoting or artistic, and can go down the ice, across the ice or pivot around a certain point. Features that increase the difficulty include different configurations, change of holds, change of axis, pivoting and change of position.

INTERSECTION

An intersection includes four phases: preparation, approach, point of intersection and exit. An intersection can be done in multiple ways including a two line, combined, angled, collapsing shape or whip. The point of intersection (pi), when the skaters actually pass by each other, can be done with a rotational turn, glide or free skating move. The intersection can be skated without a pi and encourages creativity.

EVENTS

ISU WORLD SYNCHRONIZED SKATING CHAMPIONSHIPS 2020

LAKE PLACID, NEW YORK
APRIL 3-4, 2020

OVERVIEW

The International Skating Union (ISU) granted U.S. Figure Skating the right to organize the ISU World Synchronized Skating Championships 2020. The event returns to the United States for the first time since 2017 in Colorado Springs, Colorado, and marks the fifth time the U.S. has hosted the event. The United States also hosted the World Synchronized Championships in 2000, its inaugural year, in Minneapolis.

COMPETITION VENUE

Herb Brooks Arena
2634 Main Street
Lake Placid, New York 12946

AGE ELIGIBILITY

All competitors must be 15 years old by July 1, 2019, to be eligible for the World Championships.

U.S. TEAM — ATHLETE SELECTION

The 2020 U.S. World Synchronized Skating Team will be selected following the 2020 U.S. Synchronized Skating Championships by U.S. Figure Skating's Synchronized International Subcommittee, taking into consideration the results of events in the following order of importance:

- Tier 1
 - 2020 U.S. Synchronized Skating Championships
- Tier 2
 - 2019-20 international competitions
- Tier 3
 - 2019-20 U.S. domestic competitions meeting the requirements set by the Synchronized International Subcommittee

Additionally, all members of the chosen teams must be ISU senior age eligible and a current member in good standing of U.S. figure Skating at the time of their selection.

CALIFORNIA CUP 2019

IRVINE, CALIFORNIA
NOV. 8-9, 2019

OVERVIEW

The Challenger Series Synchronized Skating is a series of international synchronized skating competitions financially supported by the ISU. In its inaugural season, the United States was chosen to debut the series at the California Cup. A Challenger Series event will alternate between the U.S. and Canada every year. The purpose of the Challenger Series Synchronized Skating is to give adequate opportunities for teams to compete internationally and earn World Standing Points in preparation for ISU Championship events.

COMPETITION VENUE

Great Park Ice & Fivepoint Arena
888 Ridge Valley
Irvine, California 92618

AGE ELIGIBILITY

As of July 1, 2019, all senior competitors must be at least 15 years old, and all junior competitors must be at least 13 years old and under 19 years old.

COMPETING TEAMS

Senior: Ice Storm (AUS), Les Supremes (CAN), Nova (CAN), Helsinki Rockettes (FIN), Lumineers (FIN), **Haydenettes (USA), Skyliners (USA)**

Junior: Iceskateers Elite (AUS), Nexxice (CAN), Mystique (FIN), **Skyliners (USA), Starlights (USA)**

EVENTS

2020 U.S. SYNCHRONIZED SKATING CHAMPIONSHIPS

PROVIDENCE, RHODE ISLAND

FEB. 26-29, 2020

www.ussynchrochampionships.com

OVERVIEW

The U.S. Synchronized Skating Championships, held annually since 1984, is the nation's most prestigious synchronized skating event. The city of Providence last hosted the Championships in 2015, and previously hosted the event in 2008, 1994 and 1989. The competition crowns U.S. champions at the juvenile, intermediate, novice, junior, senior, collegiate, adult and masters levels.

The 2020 U.S. Synchronized Skating Championships will serve as the final step in selecting the U.S. athletes who will compete at the ISU World Synchronized Skating Championships 2020 in Lake Placid, New York.

COMPETITION VENUE

Dunkin Donuts Center

1 La Salle Square

Providence, Rhode Island 02903

QUALIFYING STRUCTURE

The road to the Championships each year begins with the qualifying structure consisting of three sectional championships - Eastern, Midwestern and Pacific Coast.

BYES

Some senior- and junior-level teams may receive byes that automatically qualify them for the Championships. Any senior or junior team who has been assigned to Team USA to compete in an international competition during the 2019-20 season will receive a bye to the 2020 U.S. Synchronized Skating Championships.

REQUIREMENTS

The test requirements for each level competed at the Championships are detailed below: Each member on the team must be up to date on their test requirements.

- Senior: Junior test
- Junior: Novice test
- Novice: Intermediate test
- Intermediate: Juvenile test
- Juvenile: Pre-juvenile test
- Collegiate: Juvenile test
- Adult: Preliminary test
- Masters: None

SCHEDULE

A tentative event schedule for the 2020 U.S. Synchronized Skating Championships can be found online. Visit www.ussynchrochampionships.com for the latest schedule.

EVENTS SCHEDULE (SUBJECT TO CHANGE)

DATE	EVENT
Feb. 27	Novice Free Skate
Feb. 27	Masters Free Skate
Feb. 27	Junior Short Program
Feb. 28	Intermediate Free Skate
Feb. 28	Senior Short Program
Feb. 28	Junior Free Skate
Feb. 29	Juvenile Free Skate
Feb. 29	Collegiate Free Skate
Feb. 29	Adult Free Skate
Feb. 29	Senior Free Skate

2020 SYNCHRONIZED SKATING SECTIONAL CHAMPIONSHIPS

DATE	EVENT	LOCATION
Jan. 15-19, 2020	Eastern Synchronized Skating Sectional Championships	Albany, New York
Jan. 15-19, 2020	Midwestern Synchronized Skating Sectional Championships	Wichita, Kansas
Jan. 15-19, 2020	Pacific Coast Synchronized Skating Sectional Championships	Wichita, Kansas

TEAM USA

2019 World Championships Team - *The Haydenettes (multi-color)* and *Skyliners (maroon)*

TEAM USA

TEAM ENVELOPE

Following the World Synchronized Skating Championships each year, teams are added to Envelope A, B or C based the results of the previous competition season (U.S. Synchronized Skating Championships, international competitions, World and World Junior Championships). The Team Envelope is used for the sole purpose of determining initial funding. Funding is distributed based on a team's placement within the envelope and the number of skaters returning to each team.

INTERNATIONAL SELECTION POOL

The International Selection Pool (ISP) for synchronized skating is a pool of synchronized skating teams determined by the Synchronized International Subcommittee (SIS) that are eligible to be selected for an international competition. Being named to the ISP does not guarantee a spot on Team USA.

All teams in the ISP are required to complete a strategic plan and competition readiness assessment. They also have the opportunity to apply for performance development funding.

TEAM USA

Team USA is comprised of teams from the ISP that were selected to compete at an international event. All members of Team USA must have completed the strategic planning forms and exercises in addition to being monitored and proving competition readiness. Members of Team USA are strategically placed at international events in order to maximize medal potential and results throughout the season. Additional funding may be provided to off-set travel expenses. The earlier a team proves competition readiness through their monitoring session, the earlier they can be named to Team USA and assigned to an international event.

2019-20 TEAM ENVELOPE	SENIOR TEAMS	JUNIOR TEAMS
ENVELOPE A	Haydenettes	—
ENVELOPE B	Skyliners	Skyliners
ENVELOPE C	Crystallettes, Miami University	Starlights

STREAMING SCHEDULE

NBC SPORTS GOLD

Starting in the 2018-19 season, U.S. Figure Skating and NBC Sports Group offers a "Figure Skating Pass" on NBC Sports Gold, giving fans access to live and on-demand domestic and international figure skating and synchronized skating competitions. This exciting new product will feature some of the content previously offered on icenetwork.com. NBC Sports Gold is available on Apple iOS, Android, Apple TV, Amazon Fire TV, Chromecast, Roku and online at NBCSportsGold.com.

FAN ZONE

The U.S. Figure Skating Fan Zone is the best place for fans to catch up on the latest U.S. Figure Skating news, highlights, stories and social media. It aims to give fans not just the latest scores and news, but also a behind-the-scenes look at their favorite Team USA figure skaters. The Fan Zone features live coverage of Synchronized Skating Sectionals, Championships and more. It includes archives of these events, as well as on-demand coverage. Visit the website to learn more: USFigureSkatingFanZone.com.

IN YOUR COMMUNITY

Team USA alumni attend the 2017 ISU World Synchronized Skating Championships in Colorado Springs, Colorado.

IN YOUR COMMUNITY

LOCAL TEAMS

There are synchronized skating teams training and competing at various levels all over the United States. Unlike school sports, synchronized skating teams are typically formed from figure skating clubs that are member clubs of U.S. Figure Skating. U.S. Figure Skating member clubs are found at most rinks nationwide.

Synchronized skaters are talented figure skaters who enjoy participating in team sports. While synchronized skaters do not go on to professional teams, they enjoy the many benefits of participating in sport: challenge, hard work, achievement, friendships, fun, fitness and the opportunity to travel.

Synchronized skating is popular collegiately with more than 30 colleges offering club or varsity teams. While there are not yet college scholarships available, in 2020, the Synchronized Skating Athlete Support Fund was created to support the training costs for two junior and senior World-eligible teams. Additionally, the *DREAM scholarship* has been created to support developmental skaters each season through a video essay contest.

Synchro skills level synchronized skating teams typically practice one hour per week whereas teams at the most competitive levels, junior and senior, train between 15-20 hours per week. All team members must continue to maintain their skills by practicing individually in addition to team practices.

MEDIA OPPORTUNITIES

Members of the media are welcome to contact their local clubs to learn more about the sport and the many stories local clubs have to share.

Journalists can attend practices and competitions, arrange interviews with coaches and skaters, ask questions about the sport, take advantage of excellent visuals for TV broadcasts and still shots, or inquire about available b-roll and photographs. Clubs are helpful with assisting and educating the media about synchronized skating.

There are three ways to get in touch with local teams:

1. Use the contact information provided on the back cover of this guide.
2. Contact U.S. Figure Skating at 719.635.5200 or email synchro@usfigureskating.org.

BECOME A SPONSOR:
SUPPORTING YOUR LOCAL TEAM

The majority of synchronized skating teams perform at exhibitions or ice shows at local rinks. Feel free to stop by and observe, ask questions and learn about the sport.

Local businesses make great sponsors for synchronized skating teams. Most teams are willing to wear sponsor logos, include advertisements in programs of local competitions and ice shows, and publicly thank sponsors in the community and local newspapers.

Synchronized skating teams can also provide widespread publicity for sponsors through their national and international travel to competitions. The sport continues to grow, as does the number of athletes, parents, coaches and fans. Reaching out to this growing market will create noticeable benefits.
