

U. S. Figure Skating

Junior Quality Assurance (QA) Engineer

U.S. Figure Skating, the National Governing Body for the sport of figure skating, located in Colorado Springs, Colorado, is accepting applications for the position of Junior QA Engineer. U.S. Figure Skating is a member of the U.S. Olympic Committee (USOC) and the International Skating Union (ISU).

Reporting to the QA Engineer, the Junior QA Engineer is responsible for ensuring quality of U.S. Figure Skating home grown software applications such as the Event Management System, Membership Management System, and Learn to Skate USA. The Junior QA Engineer needs to be highly motivated with ownership mentality and some hands-on QA experience to safeguard of the U.S. Figure Skating product qualities. The Junior QA Engineer is required to conduct functional testing for all the features and functionalities specified in the requirement documents to satisfy the functional, and non-functional requirements.

Description and Responsibilities Include:

- Conduct functional testing for all the new and existing features and functionalities based on defined requirements in requirement documents
- Perform systems integrations testing to identify any existing defects and foresee potential breaking points and risks
- Assist User Acceptance Testing (UAT) to ensure all use case scenarios are covered and the product UX/UI meets USFS end-users' expectation
- Conduct smoke testing as a Postproduction Deployment QA mechanism
- Work closely with the Product Functional Manager to provide feedback on the functional requirements
- Assist in communicating to the business stakeholders about the deployment status
- Assist defects triage and help determine the defect severity and priority
- Assist in analyzing product defect root causes and work with business stakeholders on issue resolutions
- Assist documenting requirements including, but not limited to, User Stories including Acceptance Criteria and Testing Scripts, Process Flow diagrams, Use Cases, and Wireframes
- Assist development team to communicate with business stakeholders and Product Support team in clarifying requirements
- Assist in conducting regression testing by either executing Testing Automation scripts or going through testing scripts manually
- Assist in conducting performance testing by executing Performance Testing scripts and provide results analysis
- Working closely with development team as being part of the Agile team to assist resolving any functional relevant issues throughout project life cycle

Qualifications:

- College degree in information technology or business management preferred, or 2 yrs. experience in related Figure Skating business
- Some hands-on functional testing experiences for home-grown applications in an on-premise, hybrid-cloud, or cloud environment
- Experience in triaging defects and prioritize the tasks and to follow through defect resolution is a plus
- Must have some experiences in a team-oriented working environment to meet cross-organizational stakeholders' expectation and working with the development team to meet projects deadline
- Prior experience on testing automation is a plus
- Prior experience on performance testing is a plus
- Work experience in release management is a plus
- Knowledge and understanding of U.S. Figure Skating organizational structure, business rules and competition structure is a plus
- Exposure to some of the modern relational databases is a plus
- Ability to adapt and respond rapidly to changes in environment and priorities.
