Technical Notification 307

Dated: July 4, 2024

Re: Excel Competitions

As of July 1, 2024, all Excel Competitions will continue to use 2023-2024 Excel Program Elements and follow the 2024 Excel Technical Information Handbook through Dec. 31, 2024, with the following exceptions:

- Spin criteria from ISU Communication #2623 will be applied by the technical panel to determine spin levels.
- Rotational and edge errors and any associated V and base values will be applied as per ISU Communication #2623.
- Step sequence criteria from ISU Communication #2623 will be applied by the technical panel to determine levels.
- Any subsequent ISU Communication in which base values or GOEs are changed will also be applied for any Excel events.

Please note: This does not apply to the 2024 Excel National Final and Festival. The 2024 Excel National Final and Festival will be held using the 2024 Excel Technical Information Handbook. The event will be judged, and levels will be assigned in the same manner as throughout the 2024 Excel Series utilizing ISU communication #2558.
