

Technical Notification 321

Dated: Aug. 7, 2025

Re: Synchronized – Guidelines for Application of ISU Communication No. 2720

This technical notification outlines guidelines for the application of ISU Communication No. 2720 during domestic competitions for the 2025-26 season.

ISU Communication No. 2720 specifies a GOE of NHT -2 if a traveling element has no recognizable travel or travels less than $\frac{1}{2}$ of the ice.

For divisions with a cap of TrE1 or TrE2, achieving $\frac{1}{2}$ ice is not a realistic expectation.

For the levels listed below, a NHT -2 should only be applied when there is no recognizable travel:

- Preliminary
- Pre-Juvenile
- Open Juvenile
- Juvenile
- Open Collegiate
- Open Adult
- Masters
- Open Masters
